1. Mission and scope

NIDI's mission is to build and maintain a knowledge infrastructure for population issues. This mission takes shape by conducting high-quality scientific research into population issues (our core activity) and disseminating population information to stakeholders in academia, policy and society at large.

NIDI seeks to further strengthen its position as a unique national and leading international institute for population studies. This requires that it is firmly embedded in national and international networks. In the Netherlands it does so through focused collaboration with universities and policy makers, such as government ministries and policy analysis agencies.

While continuing to have a solid grounding in the Netherlands, NIDI aspires to secure a position as a European centre of excellence in the face of a changing academic research environment in Europe: a shared and highly competitive European Research Area. NIDI participates actively in EU Framework Programmes, initiatives of the European Research Council and the European Science Foundation and in policy research commissioned by the European Commission and the United Nations. The Institute also contributes actively to education and training as part of national and international programmes.

2. Research

NIDI research takes place in two research departments. Research projects are carried out by flexible teams of researchers. The composition of these teams, which may involve researchers from both departments, depends entirely on the subject matter of the project. The overriding theme of our research programme is 'Lives in Contexts'. Population structure and trends are the result of the behaviour of individuals, couples, families and households. The population we observe today is the outcome of past demographic processes. To understand demographic trends at the macro level we need to understand demographic behaviour at the micro level. For the latter, insight is needed into the influence of the social context on behaviour. In short, lives need to be studied in their context and since

this context consists of many dimensions and has different levels, we speak about contexts.

This overall theme is broken down into a number of research strands. 'Early stages in the life course', 'Later stages in the life course' and 'Intergenerational Relations' focus on major life course transitions and interdependencies and are the backbone of the Social Demography Department. Social issues that are addressed in these strands include the transition to adulthood, the process of retirement and the social 'ties that bind'. In the PMH Department future demographic trends and impacts are dealt with in the 'Projections and Models' strand, while two major social issues are at the core of the 'Migration and Integration' and 'Health' strands. Social and policy implications are addressed in all research strands. The analysis of policy implications of current and future demographic trends is concentrated in the research strand 'Policy Contexts'.

2.1. The Social Demography Department (SoDem)

Research in the Social Demography Department has three aims. First, it seeks to describe demographic changes by monitoring changes in the occurrence and timing of demographic events and in the interrelatedness of events. Second, it wishes to explain these changes by using the life-course perspective as a theoretical framework to integrate contributions from several scientific disciplines, by applying state-of-the-art methodology and by collecting and analyzing longitudinal datasets. Third, it seeks to illuminate the social impacts of demographic changes by focusing on both the micro- and the macro-consequences of changing life courses.

Theoretically, the programme is inspired by the life-course perspective that serves as a general theoretical framework to lend coherence to the research activities of the department. Within this perspective, emphasis is on the fact that demographic behaviour occurs within different time dimensions (biographical time, historical time, social time) and in connection with events in the lives of important others (linked lives). Inspired by these ideas, the research programme pays attention to such topics as the individual life-course precursors of demographic events, the impact of institutional arrangements on life-course decisions and the influence of family members on demographic behaviour. Methodologically, the programme uses

state-of-the-art data-analytic procedures to arrive at answers to pertinent demographic questions. A wide variety of multivariate techniques is applied, including event history analysis, multilevel analysis, simultaneous equation analysis and sequence analysis. With regard to data, the programme uses a double strategy. On the one hand, it uses official data and large datasets collected by other institutions. On the other hand, data are collected by NIDI itself. This data-collection often includes a longitudinal and multi-actor dimension.

The activities of the SoDem department are structured in four research strands. The first two strands focus on the study of two demographically and socially dense periods in the life course: the early stages of the life course, with the transition to adulthood at its core, and the later stages of the life course, with the so-called 'third age' i.e. the life phase starting with retirement at its core. The third strand focuses on intergenerational relationships. The common denominator of these strands is the 'linked lives' dimension of the life-course perspective. A fourth strand addresses the interplay of population trends and policies (the 'social time' and 'historical time' dimension of the life-course perspective).

2.1.1. The early stages of the life course

Young adulthood is a crucial life phase in which men and women take decisions in the family and work domains that have far-reaching consequences for their future life courses. NIDI research on the life courses of young adults takes both the micro- and the macro-context of demographic decisions into account and focuses on the processes of leaving home, union formation, parenthood and divorce.

Projects that were carried out in 2009 include the following:

- Reproductive decision-making in a macro-micro perspective (REPRO). Aart Liefbroer (project leader), Eva-Maria Merz.
- The timing of life. Understanding cross-national differences in the organization of the life course in Europe (LIFETIMING). Aart Liefbroer (project leader), Arieke Rijken.

The following PhD project was concluded in 2009 in this research strand:

- Life-course trajectories and well-being among young adults: Judith Soons. Aart Liefbroer (supervisor). The PhD thesis was successfully defended in November 2009 at the VU University, Amsterdam.
- The demography of young adults and intergenerational transmission. Aart Liefbroer.
- Nuptiality in the Netherlands, 1815-1970. Frans van Poppel.

2.1.2. The later stages of the life course

The third age is an eventful period in the life course where older adults experience transitions in several life domains such as work and family. NIDI research on this life stage focuses on the causes and consequences of the transition from work to retirement. Set against the backdrop of an ageing population and workforce and policies to raise the labour force participation of the elderly, individual retirement planning is an important issue in the Netherlands, also in view of increasing individual responsibility of workers for their retirement planning and savings. NIDI research explicitly pays attention to the social context of the labour market behaviour of older adults.

Projects that were carried out in 2009 include the following:

- The process of retirement. A dynamic and multi actor perspective (VIDI). Kène Henkens (project leader), Hanna van Solinge, Marleen Damman.

The following studies were executed in the framework of the VIDI project:

- Getting a grip on extending working life. Kène Henkens (project leader), Hanna van Solinge, Harry van Dalen
- Re-entering the labour force by retirees. Kène Henkens (project leader), Harry van Dalen

The following PhD project was carried out in the framework of this research strand:

- Life-course predictors of the retirement process: Marleen Damman, Kène Henkens (supervisor).

- Activating senior potential in ageing Europe (ASPA). Kène Henkens (project leader), Harry van Dalen, Wieteke Conen.

2.1.3. *Intergenerational relations*

This research strand benefits substantially from the Netherlands Kinship Panel Study (NKPS). In this large-scale survey of family relationships in the Netherlands, data from various family members were collected twice over the course of a period of three years. The panel design allows the study of how and to what extent intergenerational relations and solidarity manifest themselves and change within families. In the Generations and Gender Programme similar issues are addressed in a series of nationally comparative panel surveys and contextual databases. In 2007 the NKPS joined the GGP. Participation in the GGP enables analyses of Dutch family networks and demographic behaviour in an international context. NIDI is currently coordinating GGP. This research strand also has an ageing focus looking at how individual experiences and the events that take place during the life course affect well-being in later life. The causes and implications of the diversity in life courses of older adults are also studied, as well as intergenerational relations.

Projects that were carried out in 2009 include the following:

- Netherlands Kinship Panel Study (NKPS). Pearl Dykstra (project leader until 1 October), Eva-Maria Merz (project leader since 1 October), Aart Liefbroer, Renske Keizer, Anne van Putten, Mathieu Starink, Niels Schenk.

Two PhD projects were concluded at NIDI in 2009 in the framework of NKPS:

- Intergenerational transmission of work-family patterns and exchange of support between parents and children: Anne van Putten. Pearl Dykstra (supervisor). The thesis was successfully defended in June 2009 at Utrecht University.
- Antecedents and consequences of childlessness: Renske Keizer. Pearl Dykstra (supervisor). The thesis was successfully defended in February 2010 at Utrecht University.
- Generations and Gender Programme (GGP): a European research infrastructure on the causes and consequences of demographic developments (Gender 2007). Pearl Dykstra (project leader until 1

October), Aart Liefbroer (project leader since 1 October), Andrej Kveder, Niels Schenk, Gijs Beets.

- Multilinks. How demographic changes shape intergenerational solidarity, well-being and social integration: a multilink's framework. Pearl Dykstra (project leader until 1 October), Aart Liefbroer, Niels Schenk.

The following PhD project was carried out at NIDI in the framework of Multilinks:

- Family solidarity in aging societies: Niels Schenk. Pearl Dykstra (supervisor).
- Major ageing and gender issues in Europe (MAGGIE). Pearl Dykstra (project leader until 1 October), Tineke Fokkema.

2.1.4. Policy contexts

The social context in which the life course develops is partly shaped by policy interventions that necessitate to study the interplay of demographic trends and demographic behaviour and policy. Research in this strand aims to be supportive to evidence-based policy making and analyzes policy implications of current and future demographic trends as well as attitudes about population issues and their policy implications.

Projects that were carried out in 2009 include the following:

- Population issues in the Netherlands (WPRB 2009). Nico van Nimwegen (project leader), Liesbeth Heering, Carlo van Praag, Gijs Beets, Kène Henkens, Harry van Dalen.
- Demography network of the EU social situation observatory (DemoNet). Nico van Nimwegen (project leader), Rob van der Erf, Joop de Beer, Jeannette Schoorl, Eva-Maria Merz, Liesbeth Heering.

2.2. The Projections, Migration and Health Department (PMH)

The life course perspective serves as the common denominator in the research projects of PMH. The overall theme of 'Lives in Contexts' is elaborated in three related research strands: Population Projections

and Models, Migration and Integration, and Health. The models and methods that are developed and applied aim to improve population and health projections, to estimate international migration flows and to assess the impact of health and other interventions.

NIDI research focuses on interdisciplinary analyses that take the multiple causes and consequences of demographic change into account. In the research strand Population Projections and Models, research activities include the development and application of demographic models as well as analyses of the causes of demographic changes. The models are applied both to demographic projections and to assessing the economic and social consequences of demographic changes. The projection models developed are multistate models.

International migration plays a major part in shaping the demographic future and thus the second research strand focuses on international migration and the integration of migrants in Europe. Both substantive and methodological issues are addressed.

The third research strand focuses on health and includes both analyses of health status and health care. The impact of risk factors, such as smoking and obesity, on health and healthcare is analyzed. For this purpose multistate models are used similarly to the models developed in the Projections strand. In addition the effects of health systems on the availability and affordability of healthcare are analyzed. Affordable healthcare means the provision of care at a reasonable cost, both for governments and for the private sector (companies, households). Financial information is crucial to understanding the performance of health systems.

2.2.1. Population projections and models

The focus of this research strand is the development of population projections and models. In order to improve the quality of population projections broken down by various characteristics, NIDI research focuses on the development and application of multistate models. In these models the distribution of people among so-called states (marital status, employment status, health status etc.) is the outcome of transitions people make in their life course. Multistate models are 'dynamic' models: individuals move between states (e.g. from being single to married, from unemployed to employed, from healthy to unhealthy) and as a consequence the structure of the population changes. A major advantage of dynamic models is that they reflect more closely the process of demographic change in the real world. As

a result, they are better suited for integrated population projections and for assessing the impact of behavioural change on population dynamics. As multistate models project the population on the basis of transitions that individuals make in life, such models fit well in the NIDI strategy where the life course approach is central to explaining demographic behaviour.

Projects that were carried out in 2009 include the following:

- Bridging the micro-macro gap in population forecasting (MicMac). Nicole van der Gaag (project leader), Joop de Beer, Frans Willekens, Peter Ekamper, Govert Bijwaard.
- Social statistical information system and population census Aruba (Aruba 2010). Frank Eelens.
- Demographic and migratory flows affecting European regions and cities (DEMIFER). Joop de Beer (project leader), Nicole van der Gaag, Rob van der Erf.
- New housing development, housing vacancy chains and segregation (Peter Ekamper)

The following PhD project was carried out in this research strand:

- Microsimulation model SIMFIRMS 3: Corina Huisman. Leo van Wissen (NIDI/Groningen University, supervisor).

2.2.2. *Migration and Integration*

The quality of migration statistics in many European countries is still poor. NIDI activities focus on how to improve the quality and comparability of migration statistics. For this purpose NIDI develops methods to accurately estimate missing data in order to generate a synthetic database on international migration in Europe. As the number of international migrants has increased, immigration and integration issues have gained importance. Many immigrants have a relatively low level of educational attainment. This affects not only the integration of the immigrants themselves but also that of their children, the so-called second generation.

Projects that were carried out in 2009 include the following:

- Modelling migration and migrant populations (MIMOSA). Joop de Beer (project leader), Rob van der Erf, Peter Ekamper, Frans Willekens, Govert Bijwaard.

- The integration of the European second generation (TIES). Liesbeth Heering (project leader), George Groenewold, Tineke Fokkema, Laurence Lessard-Phillips.
- Scenarios of the multi-ethnic society (SMS). George Groenewold (project leader), Joop de Beer, Jeannette Schoorl.

In the context of this research strand the following PhD projects were carried out:

- Partner choice and union formation of second-generation migrants: Doreen Huschek. Aart Liefbroer (supervisor) and Helga de Valk (University of Brussels, co-supervisor).
- Estimation of international migration flows in Europe: Beata Nowok. Frans Willekens (supervisor).

2.2.3. *Health*

The focus of this theme is on health systems with an emphasis on the performance of these systems and an analysis of risk factors and interventions on health and healthcare costs. As financial transactions are a major component of the functioning of health systems, it is important to analyze financial flows. NIDI has charted global resource flows for population activities since 1997 in the context of reviewing progress towards the achievement of goals set at the International Conference on Population and Development (ICPD, Cairo 1994) and its follow-up. The resource flows relate to spending on four areas of population activities in developing countries and countries in transition: family planning, reproductive health, sexually transmitted diseases (including HIV/AIDS), and population policy and the collection and analysis of demographic data.

Projects that were carried out in 2009 include the following:

- Financial Resource Flows for Population and AIDS activities (RF). Maja Micevska (project leader), Erik Beekink, Annemarie Ernsten, Mathieu Starink, Frans Willekens.
- Demography-Epidemiology-Actuariat (DEA). Frans Willekens (project leader), Mieke Reuser, Luc Bonneux.

The following PhD project was carried out in the framework of DEA:

- The impact of risk factors on active life expectancy: Mieke Reuser. Frans Willekens (supervisor), Luc Bonneux (co-supervisor).

- Assessing Needs for Care in European Nations (ANCIEN). Luc Bonneux (project leader), Nicole van der Gaag, Govert Bijwaard.
- The long-term development of public health. Frans van Poppel (project leader), Peter Ekamper, Aart Liefbroer.

3. Performance

Some key events in 2009

From the start of this international programme NIDI has been involved in the Generations and Gender Programme (GGP), a system of nationally comparative surveys and contextual databases, which is aimed at improving the knowledge base for policy-making in UNECE countries. In 2007 NKPS joined GGP which enables analyses of Dutch family networks and demographic behaviour in an international context. To enhance this comparability NKPS data were harmonized with the GGP as part of NIDI's ongoing commitment to this international programme. In GGP the impact of policy and welfare regimes on demographic behaviour, labour market participation, and care to older and younger family generations can be studied. NIDI was part of an international consortium that succeeded in acquiring multi-year funding under the 7th Framework Programme of the EU to further elaborate the GGP (GENDER2007). NIDI is currently leading this EU infrastructure project which started in January 2009.

In the fall of 2009 NWO-MAGW decided to subsidize a third wave of the Netherlands Kinship Panel Study (NKPS) through its Programme on Studies of Social Change. Matching for this third wave is also provided by the Academy, Utrecht University, the University of Amsterdam, and Erasmus University Rotterdam. Eva-Maria Merz was appointed co-ordinator of this third wave of the NKPS.

Demographic and socio-economic trends and policy impacts are monitored in the framework of the Social Situation Observatory of the European Commission which aims to inform the social policy debate in the European Union. NIDI is leading the Demography Network (DemoNet) of the Observatory which further consists of the Institut National d'Etudes Démographiques (INED, Paris), the Vienna Institute for Demography (VID, Vienna) and the Rostock

Center for the Study of Demographic Change (RCDC, Rostock) a partnership of the Max Planck Institute for Demographic Research University of Rostock. The primary task of the Demography Network which started its work in the new composition in January 2009 is to monitor social and demographic trends in the European Union from a comparative perspective, to provide policy-relevant analysis of these trends, their determinants and implications and to monitor key policy-relevant research findings.

Tineke Fokkema spent the second half of her sabbatical in Morocco from May till August 2009. The main objective of her sabbatical research project was to (1) gain insight into the economic and social consequences of return migration, and (2) study the effects of (return) migration on family relations. This project was a combination of quantitative and qualitative research. Besides having the exclusive permission to analyze data of the large-scale survey 'La migration de retour des Marocains résidant à l'étranger' (N=1,467), in-depth interviews were conducted in Tinghir (Todgha oasis Valley in southern Morocco) among elderly returnees (25) as well as the sons of elderly return migrants (26) who were left behind in Morocco.

Pearl Dykstra stayed at the Netherlands Institute for Advanced Studies in the Humanities and Social Sciences (NIAS, Wassenaar) from 1 April until the end of June 2009 to finish a sabbatical that had to be interrupted six years ago. The objective of her research project ('Family solidarity across Europe') was to investigate differences in intergenerational family solidarity patterns across Europe, and to identify policy regimes under which intergenerational family solidarity patterns constitute risks, and correspondingly, policy regimes under which family relationships and individual well-being seem positive. Analyses compare the relative merit of exchange theory (which assumes that support-giving involves costs) versus solidarity theory (which assumes that support-giving is not a pure cost but also brings rewards) in various European countries. She examines whether the association between intergenerational solidarity patterns and well-being varies, depending on the direction of exchange (up, down or across the family lineage) and the balance of the exchange (over- or underbenefitting, equitable giving and receiving). Data from the Generations and Gender Programme are used.

From the beginning of May until the end of June 2009 Corina Huisman spent a sabbatical leave at the Population Research Center (PRC) in Groningen where she worked on her PhD dissertation based on the SIMFIRMS project.

On 15-16 June 2009 the constituting meeting of the European Population Partnership (EPP) took place at NIDI. Representatives of over 20 population research institutes from all corners of Europe discussed the substantive and organizational issues of this new organization. NIDI took an active part in creating EPP jointly with The Max Planck Institute for Demographic Research (MPIDR) and INED. EPP has as its goal to mobilize Europe's demographic researchers to coordinate and strengthen their efforts to contribute reliable facts and findings to public discussions of population issues.

Also in 2009 NIDI continued its membership of the European Consortium for Sociological Research (ECSR). ECSR wishes to stimulate sociological research in Europe as well as scientific collaboration.

Starting in 2009 NIDI subscribes to the Web of Science through a special KNAW license. Web of Science provides access to the data bases of the Science Citation Index, the Social Science Citation Index and the Arts & Humanities Citation Index and currently contains over 39 million references. Web of Science will also provide access to full text articles from Science Direct as well as from some other publishers.

Currently a PhD trainee at NIDI, Marleen Damman obtained her Research Master's degree in Sociology with Honours from Groningen University earlier in 2009. Marleen also received the Groningen University Fund Award which was presented at the opening of the Academic Year 2009-2010 to nine excellent students.

Pearl Dykstra left NIDI per 1 October to take up the Chair in Empirical Sociology at Erasmus University Rotterdam. By the end of 2009 it was known that Anne Gauthier would take up this position and join NIDI from 6 August 2010 onward. Anne currently is professor of Sociology at the University of Calgary and also holds the Canada Research Chair in Comparative Family Policy. Anne received her PhD

(on the effect of family policies on fertility in developed countries) from the University of Oxford and has extensive experience in demographic and policy research.

As Secretary-General and Treasurer Nico van Nimwegen played a major role in organizing the 26th International Population Conference of the International Union for the Scientific Study of Population (IUSSP) in Marrakech. This world conference attracted a record number of participants including several NIDI staff. At the conference Pearl Dykstra jointly with Sanna Read and Cecilia Tomassini of LSHTM was among the five winners of a Best Poster Award, for a poster on Fertility History and Intergenerational Exchanges in Later life which was based on the Multilinks project.

As of 1 September 2009 Harry van Dalen took up a Chair in Macro Economics at the University of Tilburg. As the appointment is on a part-time basis Harry will continue his work at NIDI on the interface of economics and demography. As of 9 November Harry was also appointed scientific secretary of the DSB Committee. This Committee investigates the demise of the Dutch DSB Bank in October 2009 as well as the financial oversight by the AFM Financial Authority and the Nederlandsche Bank. The Committee is chaired by professor Michiel Scheltema and is expected to report to government in the beginning of 2010.

Harry van Dalen and Kène Henkens were awarded the second prize in the VOGON PropertyNL Research Award 2009 for their article ‘Onvermoede Baten van Bevolkingskrimp’ (Unexpected benefits of population decline) in *Economisch Statistische Berichten* (ESB). The prize was awarded for the best article on real estate issues in Dutch journals.

As of 1 December 2009 Kène Henkens took up the new Chair in Retirement Sociology at the University of Tilburg. As professor of retirement sociology Kène is expected to develop this subject area of rapidly growing significance. The Chair was established by NIDI-KNAW in collaboration with Netspar. The Chair focuses on the sociological perspective on the retirement process and is expected to strengthen the interdisciplinary study of the retirement process at Netspar, a network for predominantly economic research and education in the field of pensions, aging and retirement.

Information on NIDI activities, including our research projects, is also provided on our website (www.nidi.knaw.nl).

Organization

Staff

As per 1 January 2010 NIDI had 49 staff members (44.7 full-time equivalents, FTE including a Directorate of 2 FTE). The research programme was carried out by two research departments. The Social Demography Department (SoDem 4.6 FTE) headed by Kène Henkens and Aart Liefbroer and the Projections, Migration and Health Department (PMH, 16.0 FTE) headed by Joop de Beer. The Support Department (12.1 FTE) led by Nico van Nimwegen was responsible for all services in support of the scientific activities.

As is shown in the table the total staff (as measured in de facto manpower) slightly increased in 2009 after several years of decline. In relative terms both the share of scientific staff as well as the share of temporary staff continued to increase.

Finance

Confirming the upward trend in the financial exploitation of the institute of the last years, the 2009 Operating Statement showed a positive balance of about Euro 150.000. This positive balance fortifies the sound financial position of the institute. Two structural factors contributed to the positive balance. In the first place we again succeeded to acquire important externally funded projects where we could reap the benefits of our previous acquisition efforts. This successful acquisition significantly contributes to the substantive innovation of our research programme and is the result of a continuing high acquisition pressure. In the second place we managed to continue to keep a very close grip on expenditures and to strictly control costs. As a result especially material costs were lower than budgeted. Also in the future we expect to continue our policy of active acquisition and tight control of costs.

The table gives an overview of the trends in some management indicators.

Tabel 1: Selected Management Indicators

Staff Indicators	2009	2008	2007	2006	2005
Total Staff (fte*)	44.3	41.3	44.8	46.5	46.4
Proportion of scientific staff %	71.7	67.5	63.5	63.0	65.7
Proportion temporary staff %	32.7	22.4	20.8	16.4	20.7
PhD trainees (fte*)	4.7	5.3	4.1	3.0	3.0
Finance Indicators					
Realized Income (€ x 1,000)	4.113	3.767	4.788	5.32	4.232
Funding by Netherlands Organization for Scientific Research (NWO) %	4.1	2.4	15.7	22.0	9.5
Funding by governmental and non-governmental organizations other than the Dutch Ministry of Education and Science (third-party funding) %	45.4	36.5	37.2	39.0	43.8

*fte: full time equivalent realized available manpower: weighted average.

4. NIDI Scientific Output in 2009

This chapter presents the scientific output of NIDI in the year 2009. This output is generated with the help of the so-called METIS system which is used throughout Dutch academia to systematize scientific output. The output is classified according to the categories that are also used in the annual factsheets of the Academy. As is shown in the table productivity continued to grow. Major outcomes of 2009 include an increase in the number of publications in refereed journals. The decline in the number of book chapters partly reflects a change in definitions, but also signifies that journals have become the major channels for scientific communication. Also media exposure saw an increase in 2009.

Table 2: NIDI output 2007-2009

	2007	2008	2009
1 Academic publications*			
a in refereed journals			
- of which in SSCI** indexed (top) journals	34	28	41
- of which in other refereed journals	18	15	12
b in other journals	11	13	11
c book chapters	42	56	18
2 Monographs*			
books	10	9	8
3 PhD theses*	1		2
4 Professional publications and products*			
a. scientific dissemination articles (Demos)	14	52	24
b. other reports	38	15	21
c. software/databases/CD's/questionnaires	5	15	13
d. book reviews	4		2
e. articles in other media	47	30	40
5 Other professional output			
a science oriented			
- academic chairs	4	4	6
- editorship journals/books	33	21	18
- referee/discussant	55	69	61
- courses/classes taught	22	12	20
- scientific prize		1	1
- PhDs supervised	22	19	21
- research trainees supervised	5	3	2
- workshops/seminars organised	7	3	9
- working -/conference papers	4	5	11
b society/policy oriented			
- committees and boards	54	35	27
- advising and consultancies	9		
- lectures and presentations	74	77	102
- press releases/newsletters	6	5	
- media coverage	211	196	247

* In accordance with the Standard evaluation protocol 2003-2009 for public research organisations.

** Social Science Citation index.

Output 2009

Articles in Social Science Citation Index (SSCI) indexed (top) journals: 41

- Alam, N., Ginneken, J.K.S. van & Timaeus, I. (2009). Determinants of perceived morbidity and use of health services by children less than 15 years old in rural Bangladesh. *Maternal Child Health Journal*, 13(1), 119-129.
- Beets, G.C.N. (2009). Baby booms and busts: waves in fertility patterns [In press]. *Anthropologischer Anzeiger*, 67(3).
- Bijwaard, G.E. & Knapp, S. (2009). Analysis of ship life cycles: the impact of economic cycles and ship inspection. *Marine Policy*, 33(2), 350-369.
- Bijwaard, G.E. & Franses, P.H. (2009). The effect of rounding on payment efficiency. *Computational Statistics & Data Analysis*, 53(4), 1449-1461.

Reuser, M., Willekens, F.J.C. & Bonneux, L.G.A.

- *Sensitivity analysis of the multistate life table: an application to an illness-death model. Presentation.* XXVI IUSSP International Population Conference, Marrakech, 27 September-2 October 2009.

Rijken, A.J. & Liefbroer, A.C.

- *Attitudes on divorce while children are young: explaining cross-national patterns. Presentation.* XXVI IUSSP International Population Conference, Marrakech, 29 September 2009.
- *Attitudes on divorce while children are young: explaining cross-national patterns. Presentation.* Dag van de Sociologie, Nederlandse Sociologische Vereniging (NSV) en Vlaamse Vereniging voor Sociologie (VVS), Amsterdam, 11 juni 2009.
- *Attitudes on divorce while children are young: explaining cross-national patterns. Presentation.* Seventh Meeting of the European Network for the Sociological and Demographic Study of Divorce, Antwerp, 25 June 2009.
- *Double demographic standards in Europe?: a cross-national study of differences in norms on family formation for men and women. Presentation.* Dutch Demography Day, Utrecht, 22 October 2009.

Rijken, A.J. & Knijn, T.C.M.

- *Couples decision-making on having a first child: comparing pathways to early and late parenthood. Presentation.* 2009 Annual Meeting Population Association of America, Detroit MI, 30 April 2009.

Rijken, A.J.

- *His and her relationship quality: effects on childbearing. Presentation.* 2009 Annual Meeting Population Association of America, Detroit MI, 30 April 2009.

Sanchez, M., Jong Gierveld, J. de & Buz Delgado, J.

- Living alone, social isolation and loneliness in Spain and the Netherlands. Poster presentation. 19th World Congress of Gerontology and Geriatrics, International Association of Gerontology and Geriatrics (IAGG), Paris, 5 July 2009.
- Network characteristics, social support and loneliness among Spanish and Dutch older adults. Presentation. 62nd Annual Scientific Meeting of the Gerontological Society of America (GSA), Atlanta, 18-22 November 2009.

Schoorl, J.J.

- *Recente trends in internationale migratie. Presentatie.* Seminar “Migratie, integratie en beleid: perspectieven op diversiteit”, Erasmus Universiteit, 12 juni 2009.

Tilburg, T. van & Jong Gierveld, J. de

- *Old and lonely: a persistent misconception? Presentation.* 62nd Annual Scientific Meeting of the Gerontological Society of America (GSA), Atlanta, 18-22 November 2009.

Tomassini, C., Read, S., Fokkema, C.M., Grundy, E. & Dykstra, P.A.

- *Fertility tempo and quantum and intergenerational exchanges in later life. Poster presentation.* XXVI IUSSP International Population Conference, Marrakech, September 27-October 2, 2009.

Other lectures: 25

Bonneux, L.G.A.

- *Veroudering en preventie. Publieksvoordracht.* Median, Essene, 21 april 2009.

Conen, W.S.

- *Preliminary results of ASPA survey research. Presentation.* Project Meeting “Activating Senior Potential in Ageing Europe (ASPA)”, University of Bremen, 10 December 2009.

Eelens, F.C.H.

- *Migration trends in the Caribbean region. Presentation.* Caribbean Subregional Expert Group Meeting to assess the implementation of the Programme of Action of the International Conference on Population and Development (ICPD), Antigua, 20-21 August 2009.

Fokkema, C.M.

- *Aanpak van eenzaamheid. Presentatie.* Buurtconferentie Stratum “Eenzaamheid/ sociaal isolement bij ouderen”, Eindhoven, 27 augustus 2009.
- *Eenzaamheidsinterventies: helpen ze? Presentatie.* Geriatriedagen, Rotterdam, WTC, 5-6 februari 2009.
- *Effecten van de hervorming van de AWBZ op eenzame ouderen. Presentatie.* Tympaan-conferentie “De staat van de Zuid-Hollandse samenleving”, Zoetermeer, 23 november 2009.

- *Herkomstgebieden in Marokko. Presentatie.* Oogstfeest RifTour, Museon, Den Haag, 19 november 2009.
 - *Origin and destination of first generation Moroccan migrants in the Netherlands. Presentation.* Conference “40 Years of Moroccan migration to the Netherlands”, Netherlands Institute in Morocco (NIMAR) and Institut Universitaire de la Recherche Scientifique (IURS), Rabat, May 14-15 2009.
 - *Presentation.* Rabat-minor Sociale Wetenschappen, Nederlands Instituut Marokko (NIMAR), Rabat, 14 October 2009.
- Gaag, N.L. van der
- *MicMac in action 1. Presentation.* MicMac Workshop “Milestone 2”, Max Planck Institute for Demographic Research, Rostock, 23-24 April 2009.
- Groenewold, W.G.F.
- *TIES-survey data: state-of-affairs and future directions. Presentation.* Project-presentation Istanbul, 23 February 2009.
- Heering, E.L., Lessard-Phillips, L. & Ross, C.
- *Profiling the second generation in Europe: first comparative results of the TIES project. Presentation.* Annual Congress of the European Geography Association (EGEA), Heeg (Limburg), 28 September 2009.
- Jong Gierveld, J. de
- *Activering eenzame ouderen. Lezing en discussies.* onbekend, Themadialoog WMO congres, Erbij, Amsterdam, RAI, 24 september 2009.
 - *Eenzaam of verbonden. Lezing.* Afscheidssymposium van Arie Ouwerkerk als directeur van Mezzo, Bunnik, 3 september 2009.
 - *Eenzaamheid in een vergrijzend Nederland. Inleiding.* Conferentie “Eenzaamheid onder senioren”, Alphen aan den Rijn, 14 mei 2009.
 - *Eenzaamheid voorkomen en bestrijden. Lezing.* Dienst Zorg en Samenleven van de Gemeente Amsterdam, Amsterdam, 28 mei 2009.
 - *Eenzaamheid. Lezing.* Vrijwilligers van het Diaconaal Opbouwwerk KPN, Amersfoort, 2 april 2009.
 - *Oud en dus eenzaam? Lezing op uitnodiging.* Geriatriedagen 2009, Beurs/WTC, Rotterdam, 5 februari 2009.
 - *Sociale netwerken, sociale stad. Lezing.* Roermond, Seniorenmiddag en debat met wethouders Roermond, 9 april 2009.
 - *Uitkomsten van onderzoek naar eenzaamheid: het taboe dat doorbroken moet worden. Lezing.* Nieuwjaarsbijeenkomst Nationale Coalitie Erbij, Amstelveen, 9 februari 2009.
 - *Vergrijzing, eenzaamheid en de noodzaak van geestelijke verzorging, Lezing en discussie.* Over de mogelijkheden van geestelijke verzorging binnen de kaders van de Wet Maatschappelijke Ondersteuning, Heemskerck, 23 april 2009.

Keizer, R.

- *Antecedents and consequences of childlessness. Presentation.* Brown bag seminar NIDI, The Hague, 30 March 2009.

Lessard-Phillips, L.

- *Profiling the second generation in Europe: first comparative results of the TIES project. Lecture.* Konrad-Adenauer-Stiftung, Strasbourg, 14 September 2009.
- *The demographic profiling of the second generation in Europe: traditional and new groups. Presentation.* Workshop “New Europeans”, The Hague, 9 November 2009.

Merz, E.-M. & Liefbroer, A.C.

- *(Dis)approving of childlessness across Europe: the role of individual and cultural factors. Presentation.* Consortium Meeting of the Project “Reproductive decision-making in a macro-micro perspective (REPRO)”, Milano, Italy, 11 June 2009.

Workshops/seminars organized: 9

Beer, J.A.A. de

- *Organisation.* NIDI-NVD seminar “What do demographic projections tell us about the future?”, The Hague, NIDI, 4 March 2009.

Gaag, N.L. van der

- *Organisation.* MicMac Workshop “Milestone 2”, Max Planck Institute for Demographic Research (MPIDR), Rostock, April 23-24 2009.

Groenewold, W.G.F. & Beer, J.A.A. de

- *Organisation.* The future of the multi-ethnic society.: expert Workshop within the context of the project “Scenarios multi-ethnic society and immigration”, The Hague, 29 September 2009.

Heering, E.L. & Crul, M.

- *Organisation.* TIES comparative data analysis workshop for the two TIES volumes, Kadir Has University, Istanbul, 24-25 February 2009.

Merz, E.-M.

- *Organisation.* Demography Network of the EU Social Situation Observatory (DEMONET) Seminar “New Europeans”.
- *Organisation.* REPRO Consortium Meeting, 16-18 November 2009.
- *Organisation.* Dutch Demography Day, Utrecht, 22 October 2009.

Nimwegen, N. van

- *Organisation.* XXVI IUSSP International Population Conference, Marrakech, 27 September-2 October 2009
- *Organisation.* Workshop “New Europeans”, The Hague, 9 November 2009.

Academic chairs: 6

- Dalen, H.P. van (period: 2009 until 2009). Full Professor of Macro-Economics (as of October 2009), Faculty of Economics and Business Administration, Tilburg University.
- Dykstra, P.A. (period: 2009 until 2009). Professor of Kinship Demography (until 31 September 2009), Utrecht University.
- Ginneken, J.K.S. van (period: 2009 until 2009). Extraordinary Professor of Demography and Social Determinants of Health, School of Health Systems and Public Health, University of Pretoria, South Africa.
- Henkens, C.J.I.M. (period: 2009 until 2009). Research Professor of Sociology of Retirement (as of 1 December 2009), Faculty of Social and Behavioural Sciences, Tilburg University.
- Liefbroer, A.C. (period: 2009 until 2009). Research Professor of Demography of Young Adults and Intergenerational Transmission, Faculty of Social Sciences, VU University, Amsterdam.
- Willekens, F.J.C. (period: 2009 until 2009). Honorary Professor of Population Studies, Population Research Centre, University of Groningen.

Courses/classes taught: 20

Beets, G.C.N.

- College in blok 204 Bevolkingsdynamiek en beleid, Universiteit van Amsterdam, 29 oktober 2009, 16 november 2009 en 3 december 2009.
- Population policy in the Netherlands and Europe: reactions on population decline and ageing: population dynamics in the Netherlands and Europe, 2009-2010. Lecture, University of Groningen, 19 October 2009.

Bijwaard, G.E.

- Labour market status and migration dynamics. Guest lecture, Population Research Centre (PRC), University of Groningen, 23 September 2009.

Bonneux, L.G.A.

- Forecasting mortality in Turkey, Actuarial course, Ministry of Social Affairs and Employment, The Hague, 3 November 2009.
- Mexicaanse griep. Bijscholing, Bedrijfsgezondheidszorg Maetis, Houten, 30 september 2009.
- Public health challenges: hype or hope? Master class, Netherlands School of Public & Occupational Health (NSPOH), Amsterdam, 9 June 2009.

Eelens, F.C.H.

- Census and Survey Processing System (CSPro), Course for staff members of the Central Bureau of Statistics, Oranjestad/Aruba, 2009.

Ekamper, P.

- Using historical cadastral maps in demographic research: some examples from the Netherlands, Curso de Postgrado del CSIC “La Salud de la Población: análisis Demográfico y Estadístico, Consejo Superior de Investigaciones Científicas” (CSIC), Madrid, 14 januari 2009.

Fokkema, C.M.

- Loneliness: myths and realities. Guest lecture, Lecture course in Public Health Research: from Epidemiology to Health Promotion, Module 1. Analysis of Population Health, Netherlands Institute for Health Sciences (NIHES), Erasmus University, Rotterdam, 20 October 2009.

Jong Gierveld, J. de

- Ageing in Georgia: causes and consequences: an international comparative perspective. Guest lecture, Tbilisi State University of Economic Relations (TSUER), Tbilisi, Georgia, 15 October 2009. At the request of Prof. M. Ukleba and Prof. T. Busstra.
- Marriage and partner relationships. Guest lecture, Department of Human Ecology, University of Alberta, Edmonton, 24-29 September 2009. At the request of Prof. N. Keating.

Keizer, R.

- Reproduction, Course “Contemporary topics in medical anthropology and sociology”, University of Amsterdam, 19 November 2009.
- Reproduction. Lecture, Course “Contemporary Topics in Medical Anthropology and Sociology”, University of Amsterdam, 19 November 2009.

Lessard-Phillips, L.

- The second generation in Europe: vertical and horizontal integration issues. Lecture, Course “Population Dynamics in the Netherlands and Europe”, University of Groningen, 7 October 2009.

Liefbroer, A.C.

- The Second Demographic Transition: recent trends in demographic attitudes and behaviour. Guest lecture, Rijksuniversiteit Groningen (2nd year BA).

Merz, E.-M.

- Intergenerationele solidariteit vanuit een gehechtheidsperspectief. Gastcollege, Inleiding in de Sociologie (eerste jaar), Vrije Universiteit Brussel, 19 mei 2009.

Nimwegen, N. van

- Population and policy: the European perspective. Lecture, Sociology Department, University of Calgary, Canada.
- Population, policy and the role of science. Lecture, VU University, Amsterdam, 4 December 2009.

Poppel, F.W.A. van

- Kindersterfte en de rol van medici. Lecture, Summer School Public Health, Netherlands School of Public and Occupational Health, Leusden, 27 August 2009.
- De rol van medici in de sterfte- en vruchtbaarheidsdaling in negentiende-eeuws Nederland. Lecture Vlaamse Vereniging voor Demografie, Ghent University, 20 april 2009.

PhDs supervised: 21

Dykstra, P.A.

- Supervisor/promotor of completed, internal PhD Anne van Putten, PhD awarded 26 June 2009, Utrecht University (The role of intergenerational transfers in gendered labour patterns).

Fokkema, C.M.

- Co-supervisor Eric Schoenmakers, VU University, Amsterdam.
- Review, University of Salamanca, Spain, Marta Mónica Sánchez Rodríguez, “Determinantes sociales de la soledad en las personas mayores Españolas: dar y recibir apoyo en el proceso de envejecer”, PhD awarded 23 June 2009.

Ginneken, J.K.S. van

- Supervisor Joshua Kembo, University of Pretoria, South Africa “Childhood mortality in Zimbabwe: trends and determinants in the late 1980s to late 1990s”.

Henkens, C.J.I.M.

- Supervisor Marleen Damman, Netherlands Interdisciplinary Demographic Institute (NIDI).
- Supervisor Wieteke Conen, Netherlands Interdisciplinary Demographic Institute (NIDI).
- Supervisor Bianca Suanet, Tilburg University.
- Supervisor Kasia Karpinska, Utrecht University.

Jong Gierveld, J. de

- Member PhD Committee Marta Mónica Sánchez Rodríguez, University of Salamanca, Spain, “Determinantes sociales de la soledad en las personas mayores Españolas: dar y recibir apoyo en el proceso de envejecer” (PhD awarded 23 June 2009).

Jong Gierveld, J. de

- Member PhD Committee Judith Soons “Love, life and happiness: a study of partner relationships and well-being in young adulthood”, PhD awarded 10 November 2009, VU University, Amsterdam.

Liefbroer, A.C.

- Supervisor Nicole Hiekel, Netherlands Interdisciplinary Demographic Institute (NIDI) and VU University Amsterdam.

- Supervisor Doreen Huschek, Netherlands Interdisciplinary Demographic Institute (NIDI), The Hague and VU University Amsterdam.
- Member, Reading committee Freek Bucx, Utrecht University.
- Member, Reading committee PhD dissertation of Astri Syse, Oslo Supervisor/promotor of completed, external PhD Arieke Rijken, PhD awarded 25 September 2009, Utrecht University (Happy families, high fertility?: childbearing choices in the context of family and partner relationships).
- Supervisor Mioara Zoutewelle-Merovan, VU University Amsterdam.
- Supervisor Ralf Kapteijn, VU University Amsterdam.
- Supervisor/promotor completed, internal PhD Judith Soons, PhD awarded 10 November 2009, VU University, Amsterdam (Love, life and happiness: a study of partner relationships and well-being in young adulthood).

Willekens, F.J.C.

- Supervisor Beata Nowok, PhD Groningen University, Groningen University.
- Supervisor Mieke Reuser, PhD Netherlands Interdisciplinary Demographic Institute (NIDI), The Hague.
- Supervisor/promotor of completed, external PhD K.C. Samir Kumar, PhD awarded 29 January 2009, University of Groningen (Lung health in rural Nepal: multi-state modeling of health status and economic evaluation of integrated respiratory care guidelines).

Research trainees supervised: 2

- Conen, W.S. (period: 2009 until 2009). Supervision research trainee Luuk Beckers, Faculty of Social and Behavioural Sciences, Utrecht University.
- Liefbroer, A.C. (period: 2009 until 2009). Supervisor Julia Mikola, Utrecht University.

Committees & boards: 27

Beer, J.A.A. de

- Member, Demography Platform, Statistics Netherlands (CBS), The Hague.
- Member, Sounding Board Regional Population Projections, Netherlands Environmental Assessment Agency (PBL), Bilthoven and The Hague.

Dalen, H.P. van

- Member, Committee DSB Bank, research into the rise and fall of DSB Bank for the Ministry of Finance, started in November 2009.

Fokkema, C.M.

- Member board, Geron Foundation, Loppersum.

Liefbroer, A.C.

- Member, Panel on the Transition to Adulthood of the International Union for the Scientific Study of Population (IUSSP), Paris.

- Member, Scientific Advisory Board of the Dondena Centre for Research on Social Dynamics of Università Bocconi.
- Member, The Royal Holland Society of Sciences and Humanities, Haarlem.
- Chair, Working Group on the Second Demographic Transition of the European Association for Population Studies (EAPS).

Nimwegen, N. van

- Member, International Organizing Committee XXVI IUSSP International Population Conference, Marrakech, 27 September-2 October 2009.
- Secretary General & Treasurer, International Union for the Study of Population (IUSSP), Paris.
- Member, Scientific Committee 2009 Quetelet Seminar “Population policies in Europe and in North America”, Centre de Recherche en Démographie et Sociétés, Université Catholique de Louvain, Louvain-la-Neuve, 18-20 November 2009.

Poppel, F.W.A. van

- Secretary, Foundation for the Historical Sample of the Dutch Population (HSN), Amsterdam.
- Member, Scientific Advisory Board International Database on Longevity.
- Member, Supervisory Committee Research “Historical Sample of the Dutch Population of Zeeland”.

Willekens, F.J.C.

- Member Board of Trustees, “Population Europe”, European Population Partnership (EPP).
- Member, Advisory Board Netherlands Environmental Assessment Agency (PBL), Bilthoven and The Hague.
- Member, Advisory Board Population Change and Lifecourse Strategic Knowledge Cluster, Social Science and Humanities Research Council (SSHRC), Ottawa, Canada.
- Chair, Anton C. Kuijsten Foundation for Applied Demography, The Hague.
- Chair, Committee on Education, European Association for Population Studies (EAPS), The Hague.
- Chair, Computational Humanities Programme Committee, Royal Netherlands Academy of Arts and Sciences (KNAW), Amsterdam.
- Member, IIASA-Committee Netherlands Organisation for Scientific Research (NWO), The Hague.
- Member, International Evaluation Panel for Proposals in Programme “Migration in Europe: social, Economic, Cultural and Policy Dynamics”, NORFACE, Helsinki.
- Member, Royal Netherlands Academy of Arts and Sciences (KNAW), Amsterdam.

- Chair, Scientific Board European School of Demography (EDSD), Paris/LUND.
- Member, Social Science Council, Royal Netherlands Academy of Arts and Sciences (KNAW), Amsterdam.
- Member, Steering Committee Programme “Quantitative Methods in the Social Sciences” (QMSS2), European Science Foundation (ESF), Strasbourg.
